Professional

Profile

I am a creative, curious, and solution-oriented developer with over 6 years of experience. I have gained a broad skill set across various technologies, with a strong focus on usability, accessibility, and writing clean, scalable code to create effective, user-friendly systems.

My curiosity drives me to improve how we work, not just individually but as a team. I enjoy collaborating with colleagues to streamline workflows, share knowledge, and tackle challenges together. By working closely with designers, developers, and stakeholders, I help deliver solutions that are efficient, user-focused, and in line with emerging trends and technologies.

Experience

2023 - 2024 Copenhagen

Delogue needed assistance in rewriting their legacy web app with a modern tech stack, and I was tasked, alongside their most senior developer, with leading, architecting, and building the foundation of their new application. In addition to laying the technical groundwork, I was responsible for preparing detailed documentation and onboarding Delogues other development teams.

Tech used: React, Vite, Emotion, Typescript, Playwright, Node, Storybook, Vitest, .Net, Web workers, IndexedDB, Nx, Playwright

2020 - 2023 Remote

I had a key role in the frontend team responsible for building and maintaining a component library and collaborating with the UX team to develop their design system. Additionally, I conducted training sessions for external teams and did the onboarding for new members to the frontend team.

Tech used: React, Styled-components, Docker, web components, Percy, Tanstack, Jest, AEM, Lerna, NPM

Aug 2020 - Dec 2020 Malmö

KAN's sales department needed a more efficient way to tailor contractors' CVs to meet specific client needs, but their existing CV builder tool was incomplete and produced mixed results. My task was to fix and expand the tool.

Tech used: React, Docker, Node, Material, Azure, oauth, CSS, Jest

2018 - 2020 Malmö

I worked on several of Sundprojekts construction projects, creating distinct websites for each to ensure they stood out with a unique look and feel. Our team was responsible for building and maintaining these sites, as well as managing events, signups, and other key functionalities across all these sites

Tech used: Wordpress, Javascript, React, PHP, CSS, Lottie, Google analytics

2019 - 2020 Malmö

Collaborated with SUU's team to develop their e-commerce platform, focusing primarily on re-branding their website and updating their entire checkout flow.

Tech used: Wordpress, PHP, CSS, Woocommerce, Google analytics, Bootstrap, jQuery

2018 - 2019 Malmö

Built an Andriod application to showcase Hiab and their new products and services to potential clients during conventions.

Tech used: Phonegap, HTML, CSS, JS
